

September 19, 2025: On today's first 'driven' message

As I begin today's work, the very first driven messages that I have received are related to today's Bible reading under the title of:

"Threats of Punishment"

As a continuing reminder to anyone that reads this: I am firmly advocating for the removal of USA military bases from San Antonio, Texas. I am being shown that the USA military is spreading a plethora of threats and misery around the world - near and far. On September 10, 2025, Tony Gonzales reported that he is requesting that military bases stay in San Antonio. (<https://gonzales.house.gov/2025/9/rep-tony-gonzales-passes-ndaa-amendment-to-leverage-san-antonio-s-military-strengths-ahead-of-proposed-army-north-south-consolidation>)

These threats began as 'innocent messages' that were being subtly conveyed to me from USA military veterans that are particularly close to our home and family. I am alerting law enforcement that there is a group of criminals that have an extreme amount of powerful resources gathered inside of the USA military and national security apparatus.

I am alerting law enforcement that these criminals that are operating from inside of the veil of government are actively spying on, threatening, and harming people inside and outside of the United States of America. I am publicly testifying the the 'messages' began from the Donald Trump campaign for president in 2020 and have continued to this very day.

To be clear: the pattern of threatening language and actions began with text and email messages from the Trump campaign, moved to military veterans near our home and family, and then into criminal gangs both in San Antonio, Texas, and all the way to Periana, Malaga, Spain. One of the first people to contact us in Periana, Spain, was the wife of a Freemason.

I am stating these facts publicly for anyone to read. I am doing my best to convey these messages clearly and to give substances to a 'ghostly' type of presence that is always fleeing from our vicinity. The general idea is best described as a very large gang of people that are being fed information from inside of the government and that are then sending veiled messages that can barely be understood much less captured as a criminal act.

I am working daily to gather evidence to the best of my ability and as my patience allows. I have my own life to live, but these 'forces' would rather that I spend every moment chasing their ghostly presence.

A movie to watch that metaphorically describes my experience is: Drop Dead Fred.

https://en.wikipedia.org/wiki/Drop_Dead_Fred

"He makes the trouble. She takes the blame."
